Point Of Presence Web Sites

A Point of Presence Web Site is intended to provide your customers a convenient way to find and make contact with your business.

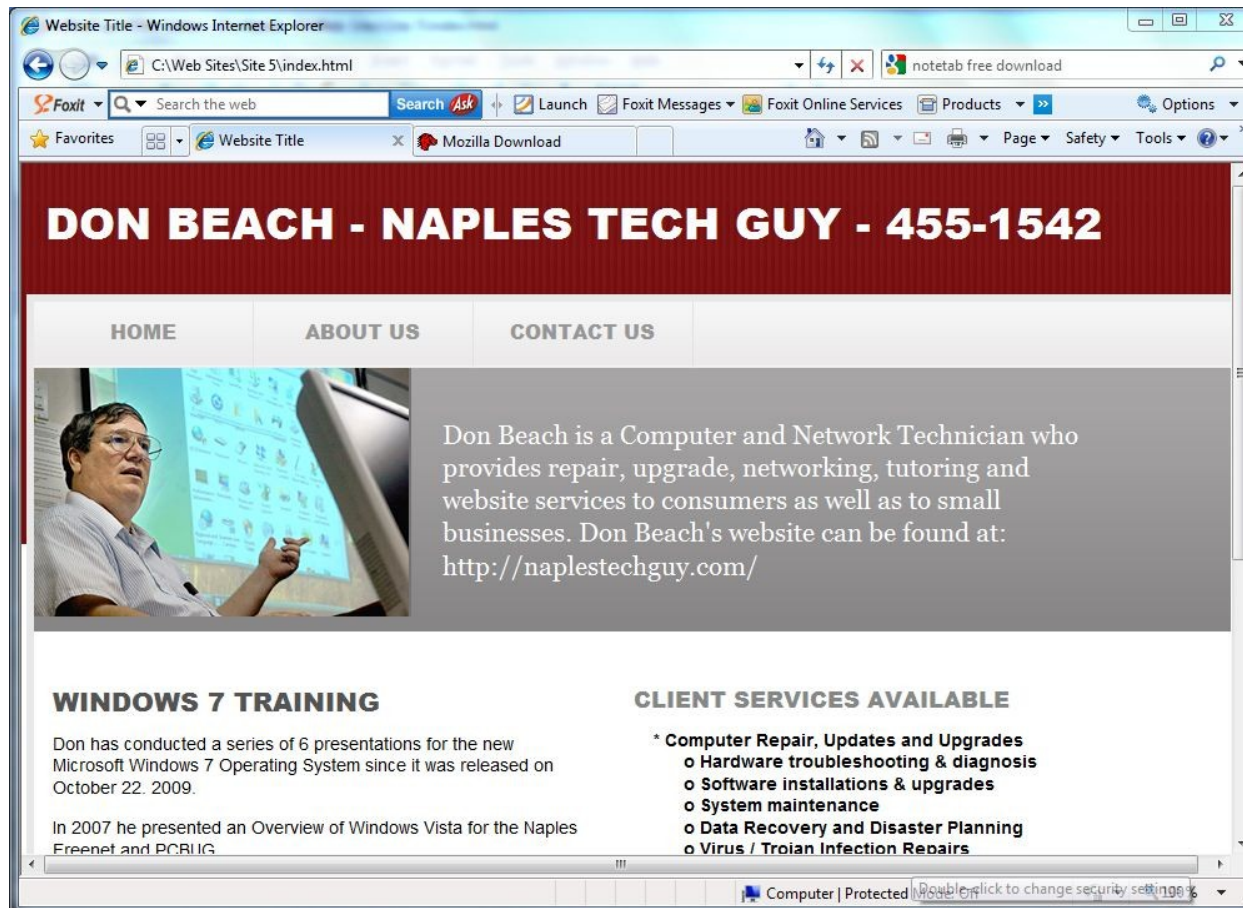

Having a web presence on the Internet is essential for every business today.

Most people almost assume that your business will have a web site and frequently look to the Internet for Products and Services.

When creating a web site, I prefer to work directly with the client in order to determine the best site design that meets the needs of your business.

Don@NaplesTechGuy.com

Designing a Web Site to support your goals. Together we can create your web site to incorporate elements of your existing promotional materials, or custom design your Web Site from start to finish. There are a lot of details to attend to at the onset: domain name acquisition, site design, web site hosting, e-mail and search engine submission. I can help you navigate this territory and succeed.

A Point of Presence Web Site allows you to be found on the Internet at low cost.

While establishing credibility with Current and Potential Clients.
